

Simpson Electric's array of special test equipment includes current leakage testers, ohmmeters, and insulation and line loop testers. Whether testing for dangerous AC/DC leakage currents, measuring resistance, or detecting line shorts, Simpson testers are versatile, easy to use, and deliver high accuracy. Industries and applications include electrical/electronics, appliance, test and inspection, telecommunications, and railroad among others.

**228 AC/DC
Leakage Current Tester**

**229-2 AC
Leakage Current Tester**

372-3 Ohmmeter

444-2 Micro Ohmmeter

**505 High Voltage
Insulation Tester**

8455 Line Loop Tester

**TS113 Multi Meter
for Railroad Servicing**
